Recruitment (continued)	STERET 25X
On May 25 or 26, 1957 recruitment of draftees, not cal	led up during November 1956,
took place. The profession of these, in their civilian	life , was machine reparing
mechanics, drivers and tractor drivers, and were there:	fore, saat to MIBASAN in a
driver training school.	
Draftees of the class of 1938 were recruited and assign	med to to the Border Guard
Army, on July 26, 1957. During the same date drafte	es of the same class, selected
as specialized drivers, were also recruited and sent t	o ELBASAN for training . 25X1
	From this last recruitment
of drivers, some of them were discharged immediately af	ter they presented themselves
office to the recruiting/of their area because theme Driver t	raining school they weald be
assigned to go was full up and there was no more place	for them . They were informed
that they would be recruited after the training of the	first part of draftees was
over, that is, in December 1957 or January 1958.	
Military Installations.	
Ammunition Depot in DURRES.	
South_East of DURRES at a place about (D L 765895) and	l about 50 meters West of the
railway bridge existing there, there is an undergroud	ammanition depot.
4 iron doors of 2 meters heigh a	
West (toward the sea). In front of each door there was	25X1 s an armed sentry and the depot
was surrounded by barbed wire .	25X1
	<u></u>
Fuel-oil Depots in DURRES .	
In the area of DURRES noticed 2 fuel oil deg	25X1

a) The first one is South -East of DURRES at a place about (C I 770-690), that is about 500 - 600 meters South-East of the above mentioned ammunition depot . This fuel oil depot is built underground and communicated with the nearby road VIONE -DURRES. 25X1

25X1

Fuel oil Used By Jets of the Albanian Air-force.

The Albanian jets use a fuel called "ELEOZ" which is also used for the tanks.

The potentiality of the "ELEOZ" is higher than that of gas and has the smell of rosemary.

This is being prepared and transported into big cylindric tanks of about 2 meters high and 1.20 m. in diameter . A 4-ton vehicle can transport only 3 tons of this fuel because of the weight and dimentions of the tanks which are of light brown colour . It is being imported from Russia , and the jets using this fuel can make a speed of 1000 km. per hour .

noticed

in the Farm Tractor Drivers School of DURRES, a column

of 3-4 vehicles, type Z.I.S. of 4 tons, transporting every 15 days tanks of "ELEOZ" from DURRES to TIRANE.

CHAPTER 2.

Greeks in ALBANIA .

The following camps of Greek escapees exist in Albainia:

- a) Camp of Greek Democrats in FIER.
 - Since Argust 1956 up to the present time informant doesn't know any info concerning this camp.
- b) Camp of Greek Internees in KRUJE.

To this camp were sent those who protested against living conditions and behaved badly. He doesn't know further details.

c) Camp of Greek privates internees in LUSHNJE.

He doesn't know any info about this camp .

d) Stock-farmers group "RROGO ZHINE".

There are about 10 to 15 families of deported VLAH shepherds in this group .

e) Group of Stock-farmers in mountain TOMORR.

There are families of deported, but doesn't know details .

f) Stock-farmers group in TEPHLENE having as winter sesidence the area of DELVINE - FIER

in this one also there

25X1

are deported families .

The total number of the deported VLAH-shepherd families in the areas of RROGOZHINE TOMORR, TEPELENE is about 200.

g) Group of Farmers in village NIVICE E BUBARIT (D K 118228)-SARANDE.

16 families of about 60 persons in all live

out of which the

the following are those who have been carried away

25X1

Family of Spiro KULIRAS 5 members from ASPROKLISION .

- " " Dhimitrios " 2 " " "
- Markos ZOIS 2 " " "
- " Dhimitris KUMBIS 2 " "
- " Georgia MATSI 3 " " TSAMADA.

The above families were tarried away forcibly in 1948 and until 1951 lived in the area of RIFASI(D K 372-012). In 1951 they were transferred to NIVICE E BUBARIT.

The rest of the families had fields in ALBANTA (RIPASI) which they cultivated until 1945, then the Albanians established Border Posts there and did not permit them to go back to Greece.

These families were the following :

Family of Filipa PESKO 3 members from TSAMADA.

- H H Ziko H 5 H H
- * Katerina STOLAKI 3 " "
- " " Hristos STOLAKIS 8 or 9 " "
- " Kostas STOLAKIS 5 " "
- " Vasiliki PESKO 3 " ASPROKLISION .
- " | LAMBRINI KOLIRA 5 | | | | | | |
- " " Grogoris MAGLARAS 3 " " "
- " Spiros DHIMITRIU 4 " " TSAMADA.
- " Athina KOTSIATI 2 " " "

The above families were transferred in 1951 from RIPASI to NIVICE E BUBARIT, and to each one 3-4 acres of land was granted fro their living.

Repatriation Tendency of Greeks in Albania.

25X1

Most of the Greeks in Albania have an argent westre of repatriation. Out of the 200 a/m families of stock-farmers 175 applied for repatriation, and those of the group of

Farming .

Cooperatives .

Progress in Collectivization in the area of DELVINE.

Cooperatives exist in all the villages of the area of DELVINE. The villages down in the plain DELVINE_SARANDE have become entirely cooperatives contrary to the ones in the mountainous area of DELVINE_SARANDE most of the inhabitants of which, despite the pressure, still stay out of the cooperatives.

The villagers belonging to cooperatives are mostly pour and quite many of them are obliged to go out to the nearby villages and do extra work against payment. This is usually done on Sundays or other days of the week after permission from the manager of their cooperatives. For instance, members of the cooperatives of the villages 25X1 VRANERO and FINIQ — SARANDE go out for extra work to

BUBARIT .

Economic failure of the cooperatives is due to psychologic reasons, in the first place, because the villagers being deprived of their own fields, they consider the work as a forced labour and don't work with their hearts. And, in the second, because of the heavy taxation - 30 kilos of their product per acre and money paid to the State.

Other reasons for this failure are: Lack of domestic animals. The villagers, before the village becomes a cooperative sell most of their animals so as to participate in the cooperative with as much as less animals as possible.

25X1

Dage	25	ŗ	7	

12.7

25X1

Refraining from using tractors, because the State gets for their use 7,5 kilos of wheat per acre for each single ploughing. Each acre should be ploughed four 14.4 times which means 30 kilos of wheat or corn to be given to the State.

Part of their products they dispose for the purchase of wool, eggs, meat, animals etc. and deliver them to the State as taxation.

Another part of their products is disposed against money in order to pay again the State taxes.

Summarizing, the production per acre of land of a first class field is about 1500 200 kilos of wheat or corn, out of which 60 kilos are given out for payment in 225 kind, and about 30 for payment of taxes in money. In other words, 90 kilos of 295 wheat is disposed and a balance of 110 kilos is left per acre. Now, out of these 110 kilos 7% is given formthe service of threshing machines, and a considerable proportion of the production, determined by the State according to the total production of the Cooperative, the number of participating families etc., is sold to the State against 2 lek per kilo. At the end, each working member of the cooperative gets about 2-6 kilos of wheat or corn for each working day. Generally, everage working days per year are 250. He also gets 50 gramms of beans for each working day.

From all these the member of the cooperative should cover/the needs of his family, thing of cource impossible in view of the high cost of living.

Mechanization of Farming.

For the purpose of mechnizing farming in Albania has 22 (S.M.T.) -(Tractor and Farming machines Station) controlled by the Ministry of Agriculture.

The equipment and organization of the Stations is different from each other. The ones along the coastal area of VIONE atom. SHENGJIN are better equipped than the rest of the service Stations, because they are serving larger areas of plains

the better equipped Stations

of DELVINE and GJIROKASTER.

That of DELVINE is in the village FINIQ and is equipped with :

Factories ((continued)
TOCANTES /	COHOTHUGGY

in this factory 7 moulds of rubber for vehicles

25X1

- b) Factory for botling oxygen, with 25 workers.
- c) Cigarette factory.
- d) Paper factory .
- e) Farming machines workshop (factory).

In this workshop they make pistons, gears and also make major repairs of Farm Tractors and other machines. It is equipped with the machinery stated hereunder and has about 200 workers.

- 1. Smelting furnace.
- 2. Electric grinders.

About 10 electric lathes .

- " 6 " special lathes making connecting rods .
- " 6_7 " countersinks.
- 2 Cylinder lubricating equipment .
- 5-6 Electric drills .
- 3 Electric Cranes of 3_4 ton capacity .

25X1

f) Brick & tile factory .

Factories in TIRANE .

- a) Yarn & Textiles Factory "stalin".
- b) Chocolate factory /
- c) "ENVER" factory, for spare parts & tools.
- d) Factory for kitchen-ware .
- e) Textile factory, under construction. (will be ready by 1958) .
- f) Factory forcement pipes .
- g) Shoe factory .

SECRET

Factories in FIER .

- a) Cotton cleaning factory .
- b) Brick & tile factory .

Factories in ELBASAN.

- a) Carpenter & lumber factory.
- b) Fruit conserving factory .

Factories in KORCE.

- a) Sugar refinery . "MALIK"
- b) Factory for undrwear.
- c) Fruit conserving factory .

Factories in VLONE .

- a) Tannery (Leather factory).
- b) Cement factory .
- c) Fish conserving factory .
- D) Rice cleaning factory .

Factories in SHKODER .

- a) Cement factory.
- b) Cigarette factory.

Factories in GJIROKASTER .

- a) Tannery (Leather factory).
- b) Cigarette factory .

Factories in RRUBIK .

During the time the ore mines of RRUBIK were under exploitation, there was a <u>smelting</u> furnace, near the mine, making cubic blocks of the ore for easier transportation.

When ore was exausted from thes mine, it was said that the <u>smeltingfurnace</u> would be moved to the area of the ore mine of BURREL mentioned above.

Info On Towns& Villages.

25X1

a) Village MIVICE E BUBARIT (D K 1224).

This village has about 150 houses and approx. 1000 - 1200 inhabitants, all Albanian speaking, chistian Nothern Epirots. (In their identity cards it is written that they are Alnanians).

The villagers get their water from 3 natural sources, and use kerosene lamps for lighting.

b) SHEN VASIL (D K 113240).

This village has about 80 houses and equal number of families, all christian Northern Epirots, Albanian spleaking.

They get water from 3 sources, and kerosene lamps are used for lighting.

c) <u>HUNDECOVE (D K 0925)</u>.

It has about 15 houses with equal number of families, Albanian speaking, christian Northern Epirits. They get water from sources and use kerosene lamps for lighting.

d) FINIQ (D K 2018).

This has about 110 houses and equal number of families, christian Albanian pseaking Northern Epirots. They get water from natural sources and lighted by kerosene lamps.

e) MAVROPULL (D K 1920) .

Has about 25 houses and same nubmer of families, christian Albanian speaking Northern Epirots. They get water from sources and light he kelligene lamps.

page 37____________

25X1

f) KARAHAXHI (D K 1818).

This village has about 35 houses and the same nubmer of families, christian Greek: speaking Northern Epirets. They get water form one natural sturce and lighted by kerosene lamps.

g) SHIJAN (D K 1819).

It has about 20 houses with an equal number of families, Chams, escapees from Greece.

h) KULLUTICE (DK 235070).

This has about 60 houses with equal number of families, christian Greek speaking Northern Epirots. They get water from sources and are lighted by kerosene lamps.

44 HALO (D K 228089) .

It has about 30 houses and the same number of families, christian Greek speaking.

Northern Epirots. They get water from sources and lighted by kerosrnr lamps.

j) <u>karalibej (d k 202085)</u>.

Has about 25 houses with equal number of families, christians Greek speaking Northern Epirots. They get water from one natural source and are lighted by kerosene lamps.

k) HOXHAJ (D K 2505).

It has about 35 houses and the same number of families, christian Greek speaking Northern Epirots. They get water from tow natural sources and are lighted by kerosene lamps.

1) VAGALAT (D K 247000).

Has about 60 houses with the same number of families. They get water from 4 - 5 natural sources and lighted by kerosene lamps. All the inhabitants are christian greek speaking Norbbern Epirots.

Change of the name of villages .

The names of the following villages changed during the Communist Regime :
